# Health ALERT

## Confirmed Case of Measles in Madison, Wisconsin

February 6, 2026

While there have been no reported cases of measles in Winnebago County, the University of Wisconsin-Madison (UWM) is reporting a confirmed case that has been connected to campus. For additional information on the community exposure locations please see <https://publichealthmdc.com/your-health/measles>.

Given the close proximity and movement of Winnebago County residents between the university campus and Winnebago County, healthcare providers are advised to be aware of the situation. Individuals who present with symptoms of fever, cough, rhinorrhea, conjunctivitis and rash and have been in the UWM campus area should be assessed for measles. Prompt isolation of a suspected measles case and notification to the Winnebago County Health Department at **815.720.4050** will reduce the risk of transmission in your practice areas and the community.

For more information on measles, please see the CDC website <https://www.cdc.gov/measles/index.html>.
